

CHAKA KHAN FOUNDATION

Assisting Children at Risk

Dear Friend,

"To whom much is given, much is expected." I have been blessed with the opportunity to live my dream. I started the Chaka Khan Foundation to help children overcome adversity and be able to live their dreams.

The Chaka Khan Foundation **educates, inspires and empowers children to achieve their full potential** through our *Chaka Believes* program. This program provides one-on-one tutoring and personal development workshops for students. We are creating the bridge for these young people to travel from underperforming schools to college.

Our program is making a considerable difference in the success of our students. During our 2009/2010 school year program we saw the following results

- At the beginning of this school year 36% of our students were testing below grade level in writing, 15% were below grade level in reading and 38% were below grade level in math.
- At the end of the school year 93% of the students were testing at or above grade level in writing and reading. 97% of the students were testing at or above grade level in math.
- After completing the tutoring program this year 72% of the students had increased their grade levels in writing, reading or math by at least two grade levels.

I never knew that I could make such an impact on the life of a child. It is without a doubt the best thing I have ever done. It is such a beautiful thing to see them happy, to see them understanding, to see them anxious to learn and to see them excited about their future. Would you consider joining me on my journey with these children? Your donation of any amount will change the life and future of a child in need. Please make a contribution today.

With love and gratitude,

Chaka Khan, Founder

*P.S. Through your donation you are giving the gift of a future. This is an incredible blessing – not just for the child you are helping, but also for you. **Please make your donation today.***
